Turning hoarding into an **art form**

VisionPly
DIGITAL

What it's used for

VisionPly is a revolutionary eco-boarding and display panel, developed to meet the growing environmental demands of the construction, retail, advertising, leisure, theme park and signage industries, and can be used for both temporary and permanent installations.

Key points

- **100% recyclable**
- **Fully weatherproof**
- **Direct to substrate digital print**
- **Cuts three processes down to one***
- **Most time and cost effective hoarding**
- **Available in various thicknesses and sizes**

*The normal three process for a typical project would be plywood install, paint, printed aluminium/foamboard panels.

Heavy duty boards can be used to construct building site hoardings, to provide a highly visual yet safe and secure surround for hazardous areas.

It is also an eye-catching solution for theme park attractions and the leisure industry as a more permanent surround.
